

Díí baa' ádahotłchijh!

**Water from these wells* in Baca-
Prewitt-Haystack is NOT safe to drink**

**Advisory issued jointly by DiNEH
Project and NNEPA-PWSSP**

**Dec. 2007, Rev. Feb., Mar. 2008
Call 505-262-1862 or 928-871-7755
or visit www.navajopublicwater.org**

****Navajo Nation policy is that these wells are for livestock use only and are not to
be used for human drinking water.***

Contaminants in these wells exceed Navajo EPA and USEPA human drinking water standards!

- **16B-38:** Iron, Nitrate, Uranium
- **16T-317:** Nitrate, Uranium
- **16T-521:** Arsenic, Iron, pH, Uranium, Total Dissolved Solids
- **16T-552:** Fluoride, Sodium, Sulfate, TDS

- **Arsenic** — skin color disease, warts; liver, bladder cancers; kidney disease
- **Fluoride** — bone disease; tooth decay, discoloration
- **Iron** — gives water rusty, metallic taste
- **Nitrate** — “blue-baby syndrome” in infants less than 6 months old
- **pH >8.5, Sulfate, TDS** — laxative effect on digestive system; leaves water with “soapy” feel
- **Sodium** — adds salt to water; worsens high blood pressure, heart disease
- **Uranium** — kidney disease; bone, lung cancers

REMINDER: DiNEH project has NOT tested these wells for bacteria, which has been high in >75% of wells in other areas of the Navajo Nation. DiNEH Project also does not test for pesticides, solvents or radioactive substances. Radioactive substances will be tested as part of the USEPA/NNEPA “re-sampling” program during Spring 2008.
